Curriculum vitae last updated: 06/06/2023

EDUCATION

- Ph.D. 2018** Engineering Sciences, Ternopil Ivan Puluj National Technical University, Ukraine
Dissertation: Justification of the Parameters and Orientation Bernoulli Gripping Device
of the Manipulator for the Automation of Handling Operations
- M.S. 2014** Automated Systems of Manufacturing Control, Ternopil Ivan Puluj National
Technical University, Ukraine
With Honors
- B.S. 2013** Automation and Computer-Integrated Technologies, Ternopil Ivan Puluj National
Technical University, Ukraine

CURRENT POSITIONS

- 2022-present Research Fellow, Texas Robotics, College of Natural Sciences and the Cockrell School of
Engineering, The University of Texas at Austin, Texas, USA
- 2023-present Adjunct Professor, EPAM School of Digital Technologies, American University Kyiv
(Powered by Arizona State University), Ukraine
- 2019-present Associate Professor, Department of Automation of Technological Processes and
Manufacturing, Ternopil Ivan Puluj National Technical University, Ukraine

PREVIOUS POSITIONS

- 2021-2022 Fulbright Visiting Scholar, Department of Robotics Engineering, Worcester Polytechnic
Institute, Massachusetts, USA
- 2020-2021 Deputy Head of the Department, Department of Automation of Technological Processes
and Manufacturing, Ternopil Ivan Puluj National Technical University, Ukraine
- 2018-2019 Academic, Department of Automation of Technological Processes and Manufacturing,
Ternopil Ivan Puluj National Technical University, Ukraine
- 2016-2018 Assistant Professor, Department of Automation of Technological Processes and
Manufacturing, Ternopil Ivan Puluj National Technical University, Ukraine

FELLOWSHIPS AND AWARDS

- 2023 Provost's Early Career Fellowship Award, UT at Austin
- 2022 [Outstanding Reviewer Award](#), Applied Sciences MDPI
- 2022 [Machines Young Investigator Award](#), Machines MDPI
- 2022-2024 Scholarship of the Cabinet of Ministers of Ukraine for Young Scientists, Ukraine
- 2021-2022 Scholarship (Fulbright Visiting Scholar Program), Department of Robotics Engineering, Worcester Polytechnic Institute, USA
- 2020-2022 Scholarship of the Cabinet of Ministers of Ukraine for Young Scientists, Ukraine
- 2020 Award of Ternopil City Council in the nomination "Young scientists and researchers", Ukraine
- 2020 Scholarship (House of Europe), National Centre of Robotics, Slovak Republic
- 2019 Scholarship (Erasmus+), Institute of Automation, Robotics and Mechatronics, Technical University of Kosice, Slovak Republic
- 2018 Award of Ternopil Regional State Administration and Ternopil Regional Council, Ukraine
- 2017 Scholarship (SAIA), Department of Robotics and Artificial Intelligence, Slovak University of Technology in Bratislava, Slovak Republic

- [G1] DF 241-18, "Optimization of Design Parameters of Contactless Jet Gripping Devices of Industrial Robots" R. Mykhailyshyn (PI), V. Savkiv (Co-I) - (2018, № state registration 0118U001798) \$20000 in 6 months (support 1 master student). In addition was purchased a 3D printer (Wanhao duplicator 6) and material for creating an automated installation for study the operational characteristics of grippers.
- [G2] PS00322778, "Substantiation Parameters of Gripping Devices of Industrial Robots and Methods of Manipulation of Flexible Objects" (2021-2022, Fulbright Grant, U.S. Department of State (DOS), Bureau of Educational and Cultural Affairs (ECA), Exchange Visitor Program #G-1-00005 with the cooperation of the Institute of International Education (IIE)) R. Mykhailyshyn (PI) - \$30600 in 9 months.
- [G3] VK 55-16, "Development of Models for Optimizing the Orientation of the Industrial Robot Brush" V. Savkiv (PI), R. Mykhailyshyn (Co-I) - (2016-2018, № state registration 0116U005075) \$12000 in 3 years (support 1 Ph.D. student).
- [G4] DI 228-16, "Diagnostic Parameters and Mechanical Aspects of Mesoscopic Deformation Relief Formation on the Surface of Operated Steels" P. Maruschak (PI), R. Mykhailyshyn (Co-I) - (2016-2018, № state registration 0116U006422) \$140,000 in 3 years (support 1 Ph.D. and 2 master students).
- [G5] DI 244-20, "Development of a Diagnostic Complex Based on Deep Neural Networks for the Recognition of Multiple Surface Defects of Metal Structures" I. Konovalenko (PI), P. Maruschak (Co-I), R. Mykhailyshyn (Co-I) - (2020-2022, № state registration 0120U101924) \$150,000 in 3 years (support 2 master student).
- [G6] DI 232-17, "Development of a New Method for Technical Diagnosis of Welds of Main Gas Pipelines Based on Statistical Analysis of Their Structural Heterogeneity" P. Maruschak (PI), R. Mykhailyshyn (Co-I) - (2017-2019, № state registration 0117U002245) \$128,000 in 3 years (support 1 Ph.D. and 1 master students).
- [G7] DI 238-20, "Development of transport and technical systems with elastic and elastic helical working bodies" O. Lyashuk (PI), I. Hevko (Co-I), R. Mykhailyshyn (Co-I) (2020-2022, state registration number 0120U101916) - \$125,000 (support 1 master student).

Planned proposal:

- [PG1] FRR "Development of Low-Contact Jet Grippers for Soft-Tissue Manipulation in Surgical Applications" A. Majewicz Fey (PI), R. Mykhailyshyn (Co-I) - 2024-2026, \$900000 over 3 years, Mykhailyshyn Share: \$400,000.

ADVISING

2018-2021 7 master students Faculty of Applied Information Technologies and Electrical Engineering, Ternopil Ivan Puluj National Technical University, Ukraine

TEACHING EXPERIENCE

2016-2021 Automation of Manufacturing Processes

Ternopil Ivan Puluj National Technical University, Ukraine

(Taught 6 times, geared towards special topics of the food industry) The objective of this course is to raise the general educational theoretical and practical professional level of future specialists in the food industry by familiarizing them with modern systems of automatic regulation of technological parameters characterizing the quality of raw materials, semi-finished, and finished products. My contributions were the development: parts of the course devoted to the use of robotic cells in the food industry; and parts of a laboratory course devoted to robotic packaging of semi-finished and finished products.

2018-2021 Flexible Computer Systems and Robotics

Ternopil Ivan Puluj National Technical University, Ukraine

(Taught 3 times) The objective of this course is to students study the principles of building flexible computerized systems, features of the structure and functioning of industrial robots, and familiarization with the main types of robotic complexes used in various industries. My contributions were the development and implementation of both lecture and laboratory classes on robot programming in the RobotStudio software environment.

2018-2021 Object-Oriented Programming

Ternopil Ivan Puluj National Technical University, Ukraine

(Taught 3 times) The objective of this course is to understand a computer programming model that organizes software design around data, or objects, rather than functions and logic. My contributions were the implementation of a laboratory course for students majoring in "Automation and computer-integrated technologies".

2021-2021 Basics of Mechatronics and Robotics (new course)

Ternopil Ivan Puluj National Technical University, Ukraine

(Taught 1 time) The objective of this course is to consider what are robots, drives, sensors, kinematics, controllers, types and methods of control. This is completely my course, where the students have obtained comprehensive basic theoretical knowledge and practical skills in the field of mechatronics and robotics. The course is organized in such a way that 50 percent of the point's students receive during laboratory work to acquire practical skills and the rest through tests in the distance learning system.

2023 SDT 200 Computer Organization and Assembly Language Programming

American University Kyiv (Powered by Arizona State University), Ukraine

(Taught 1 time) This course focus on register-level computer organization, instruction set architecture, assembly language, processor organization and design, memory organization, IO programming, exception/interrupt handling.

2024 SDT 170 Introduction to Engineering (In process)

American University Kyiv (Powered by Arizona State University), Ukraine

This introduces the engineering design process, basic engineering skills, and provides opportunities to learn about and use various engineering tools and software. The course will also teach basic written and oral communication skills important for communicating technical information effectively. Student will learn to work in a team environment, using design methods to address multi-disciplinary real-world engineering design problems.

PROFESSIONAL SERVICE

International Program, Editorial, and Review Committees

- 2023 Editor Board Member, Transport
- 2023 Topical Advisory Panel Member, Machines
- 2022 Review Editor, Frontiers in Robotics and AI
- 2022-2023 Special Issue "Advanced Grasping and Motion Control Solutions" Guest Editor, Robotics
- 2022 Selection Committee for the Fulbright Program (Visiting Scholar)
- 2021 Grant Reviewer, Ministry of Education and Science Ukraine
- 2021 Reviewer of Projects under the Fulbright Program (Graduate Student, Research and Development, Visiting Scholar)

Administrative and Organizational Committees and Workshops

- 2023 Member of the Review Committee, International Workshop on «Computer Information Technologies in Industry 4.0» (CITI-2023), TNTU, Ukraine
- 2022 Member of the Organizing Committee, Mathematical Methods and Models of Technical and Economic Systems, TNTU, Ukraine
- 2021 Moderator Track 3: Industrial and Power Electronics & Energy Systems, IEEE 3rd Ukrainian Conference on Electrical and Computer Engineering (UKRCON), Ukraine
- 2019 Member of the Organizing Committee, IV International Scientific and Technical Conference "Theoretical and Applied Aspects of Radio Engineering, Instrumentation and Computer Technology", Ukraine.

Reviews

Journal paper reviews: IEEE Access, International Journal of Advanced Robotic Systems, International Journal of Manufacturing, Materials, and Mechanical Engineering, International Journal of Big Data Intelligence and Applications, Machines, Applied Sciences, Robotics, IEEE RAS Young Reviewers Program, AgriEngineering, Electronics, Energies, Mathematics, Micromachines, Processes, Symmetry.

Conference paper reviews: Proceedings of the Institution of Mechanical Engineers, Part C: Journal of Mechanical Engineering Science, IEEE International Conference on Intelligent Energy and Power Systems, IEEE Ukrainian Conference on Electrical and Computer Engineering.

UNIVERSITY SERVICE

- 2020-2022 Member of the Academic Council of the Faculty of Applied Information Technologies and Electrical Engineering, Ternopil Ivan Puluj National Technical University, Ukraine
- 2020-2023 Deputy Chairman of the Council of Young Scientists and Specialists of the Ternopil Ivan Puluj National Technical University, Ukraine
- 2018-2021 Secretary of the Scientific and Methodical Council of the Faculty of Applied Information Technologies and Electrical Engineering, Ternopil Ivan Puluj National Technical University, Ukraine

2018-2021 Member of committees for the defence of diploma projects of the Faculty of Applied Information Technologies and Electrical Engineering, Ternopil Ivan Puluj National Technical University, Ukraine

MAJOR COLLABORATIONS

František Duchoň,	Robotics, Department of Robotics and Artificial Intelligence, Slovak University of Technology in Bratislava, Slovak Republic.
Pavlo Maruschak	Mechanical Engineering, Ternopil Ivan Puluj National Technical University, Ukraine.
Luboš Chovanec,	Robotics, Department of Robotics and Artificial Intelligence, Slovak University of Technology in Bratislava, Slovak Republic.
Ivan Virgala,	Robotics, Institute of Automation, Robotics and Mechatronics, Technical University of Kosice, Slovak Republic.
Volodymyr Savkiv,	Gripping Design, Ternopil Ivan Puluj National Technical University, Ukraine.
Valery Kyrylovych,	Robotics, Zhytomyr State Technological University, Ukraine.
Michal Kelemen,	Robotics, Institute of Automation, Robotics and Mechatronics, Technical University of Kosice, Slovak Republic.
Illia Diahovchenko,	Electrical Engineering, Department of Electric Power Engineering, Sumy State University, Ukraine.
Jing Xiao,	Robotics, Department of Robotics Engineering, Worcester Polytechnic Institute, USA.
Minho Jo,	Computer Science, Department of Computer Convergence Software, Korea University, Republic of South Korea.
Ann Majewicz Fey,	Surgical Robotics, Walker Department of Mechanical Engineering, The University of Texas at Austin, USA.
